JUMBO ELLEPOTS™ vs Plastic Pots

How many <u>DUMPSTERS</u> do 700,000 plastic pots require?

Ellepot™ Facts

- One pallet of paper = 700,000 four inch plastic pots
- Economical
- Paper is roughly half the cost of a 4" plastic pot
- Quicker turns in the greenhouse
- Plant faster no pots to remove from plants, collect and remove from the job site, saving up to 40% on labor cost
- CO2 levels are considerably lower than plastic pots
- Save on freight
- Degrade in the landscape

Plastic Pot Facts

- Expensive
- Labor Intensive pots must be removed for planting, collected and removed from the job site
- High CO2 footprint
- Require storage space
- Longer time to grow on the bench
- Disposal or recycling fee required
